Certified specialist in Implantology - Taiwan Alliance of Dental Implant Associations

Certified specialist in Aesthetic Dentistry - Taiwan Academy of Aesthetic Dentistry

Certified specialist in Aesthetic Dentistry - Japan Society of Aesthetic Dentistry

Chairman - Honor dental clinic, Taipei, Taiwan

## Summary

All ceramic restoration including silicate based and metallic oxide is widely used in dental treatment. The mechanical and optical properties of ceramic are gradually improved. Under ceramic surface treatment, it can decrease the damage of oral tissue and provide sufficient protection and aesthetics. However, not only properties of ceramic should be considered, but also oral environment including occlusion, color and space of abutment, soft tissue, and harmony with face are also covered. In the case, I will present my thinking process and get a predictable results.
