Implants in Esthetic Zone

1996-2002 D.D.S. - CSMC

CDC Dental Clinic

Founder of Zimmer Orange Study Club Taiwan

CoFounder of Arteeth Dental Studio, Taiwan

Bio-emulation Taiwan

Summary

The success of dental implants within the aesthetic zone significantly relies on optimal spatial arrangement and soft tissue harmony. The case report will detail how strategic orthodontic treatment can effectively create the ideal spacing for implants, setting the stage for a vertical soft tissue augmentation procedure. The combined approach aims to perfect the gingival esthetics around the implant, ultimately leading to a more natural and attractive smile. The discussion will encapsulate the necessity of marrying orthodontic precision with soft tissue management to achieve both functional and aesthetic excellence in implant dentistry.
